

MOZILLA FIREFOX BROWSER CONFIGURATION INSTRUCTIONS

During the configuration of the browser the certificate carrier should be connected to the computer all the time.

STEP 1

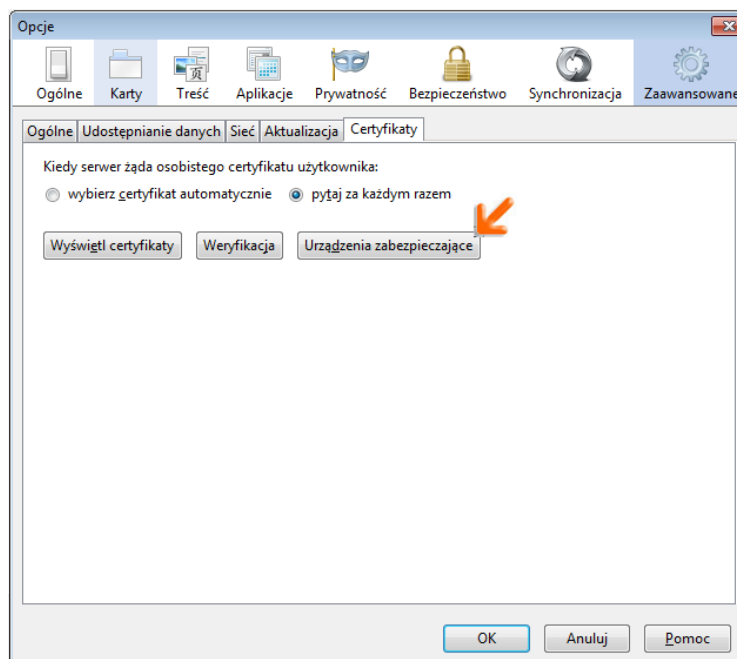

When you turn on the browser, select the **Tools** tab, then **Options**.

STEP 2

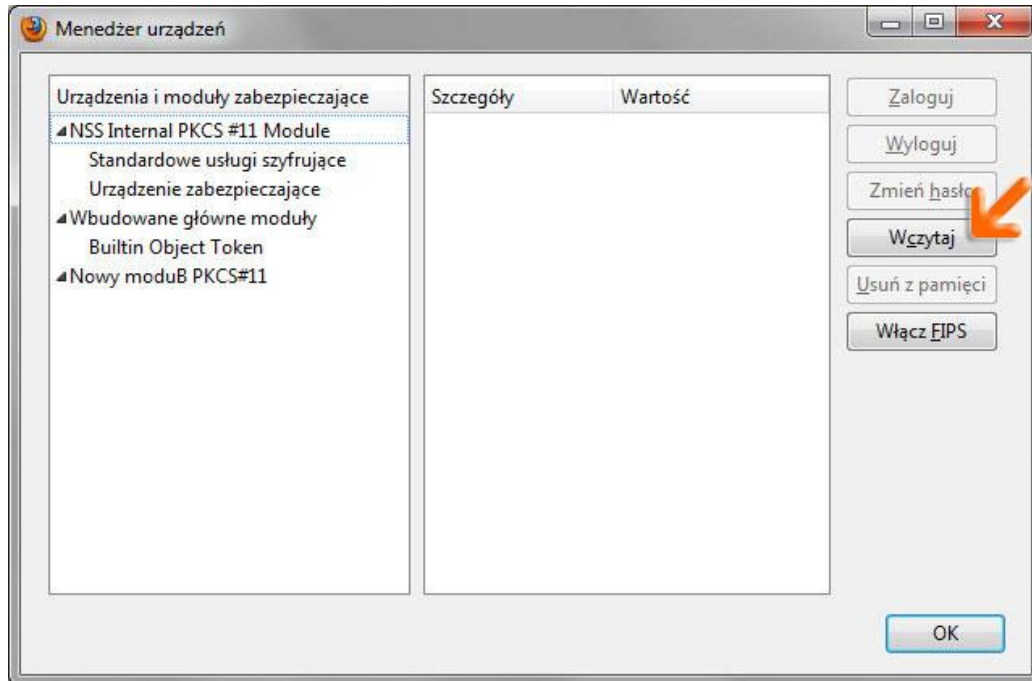

Select the **Advanced** tab, and then **Certificates**.

In the visible window, select **Security Devices**.

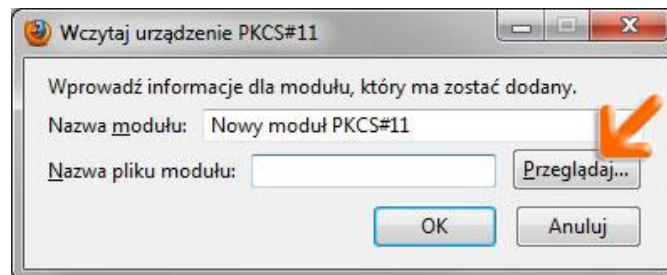

STEP 3

Then select the **Load** button.

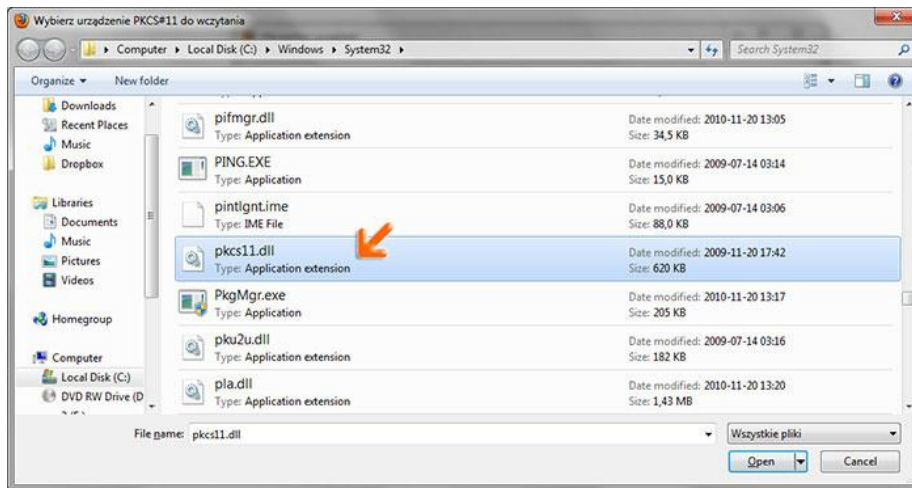

STEP 4

In the next window, select the **Browse...** button.

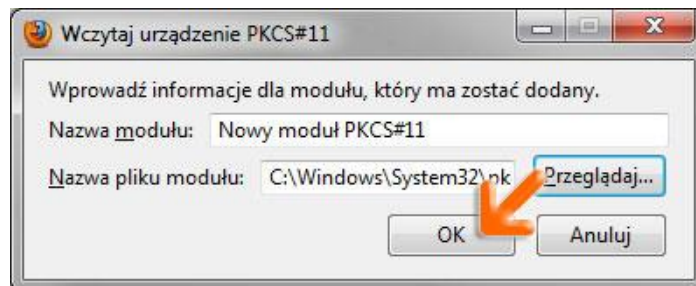

STEP 5

Go to folder **My computer/Drive C:/Windows/System32**, select the file named **pkcs11.dll** and select the **Open** button.

STEP 6

In the window displayed, select the **OK** button.

A message informing that the module has been installed correctly will be displayed.

Once all those steps are completed, turn off the browser, turn it on again and log into ING BusinessOnLine system.

STEP 7

During your first login you will be asked to install a component that allows you to generate digital signatures. The message will be displayed at the top of the browser window. Select the **Allow** button visible in it.

If this message does not appear automatically, run the installation of the component through the site <https://start.ingbusinessonline.pl/login/firefox> and select the **Install** button in item 3.

If you have any questions or doubts, we invite you to contact **ING Business Centre** at the number **32 357 00 24** or **801 242 242** or send an e-mail to the address **bc@ingbank.pl**. The Hotline is open Monday to Friday, from **8:00 a.m. to 6:00 p.m.**
